

## Summary

Senior Backend & Systems Engineer (8+ years) with experience modernizing large-scale Python/Django platforms, leading architecture decisions, and driving performance + infrastructure evolution across distributed systems. Strong ownership, 0→1 execution, and cross-team influence.

## Skills & Expertise

- **Tech:** Python, Django, DRF, PostgreSQL — API/platform design, performance tuning, data modeling
- **Architecture & Systems:** caching, read-replica scaling, schema evolution, distributed integrations, event design
- **Infra/Devops:** Docker, AWS, GCP
- **Leadership:** Technical mentorship, PR standards, cross-team influence, delivery alignment
- **Maintainer of Elpy** ( 500k+ downloads). [GitHub Link](#)

## Work Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                     |                                               |
